Matt Koch
Vice President

Matt Koch is a vice president at the U.S. Chamber of Commerce’s Global Energy Institute. Koch is responsible for leading the Institute’s efforts to expand support for the construction of oil and gas pipelines, and the development of Arctic resources, along with promoting the important role Canadian energy resources have to the U.S. economy and energy security. He is credited for building and managing the Energy Institute’s successful Partnership to Fuel America, a multistate, pro-North-American energy stakeholder advocacy network. Koch also played a role in developing policy recommendations for the Institute’s Energy Works for US platform.

Koch travels widely in the United States and Canada to raise awareness of issues impacting American energy—particularly around the need for more pipelines and improving energy infrastructure. He has provided expertise and insight at events such as the Manning Center Conference in Ottawa, Canada, and the North American Energy Security Dialogue in Vancouver, Canada, and has shared thought leadership with local chambers of commerce, including the Detroit Chamber of Commerce’s Energy and Environment Committee and the MAKO (Missouri, Arkansas, Kansas, Oklahoma) Chamber Conference.

Before joining the Chamber, Koch was director of Federal Relations at the American Petroleum Institute (API), where he was chief advocate and issue manager for all downstream and refining-related issues affecting the oil and natural gas industry. In addition, he directed API’s renewable fuels and environmental issue advocacy on Capitol Hill and with the administration. Koch was recognized for initiating and organizing an effective nontraditional coalition of food, feed, environmental, and energy businesses and trade associations to advocate on biofuels issues while at API.

During George W. Bush’s first term, Koch worked at the Department of Energy and in the White House. At the White House, he served in the Office of Cabinet Affairs as White House liaison to the secretaries of Agriculture, Interior, and Energy and the administrator of the Environmental Protection Agency.

Koch lives in Falls Church, Virginia, with his wife and two sons. He graduated from Canisius College in Buffalo, New York, with Bachelor of Arts degree in international relations.

The mission of the U.S. Chamber of Commerce’s Global Energy Institute is to unify policymakers, regulators, business leaders, and the American public behind a common sense energy strategy to help keep America secure, prosperous, and clean. Through policy development, education, and advocacy, the Institute is building support for meaningful action at the local, state, national, and international levels.

The U.S. Chamber of Commerce is the world’s largest business federation representing the interests of more than 3 million businesses of all sizes, sectors, and regions, as well as state and local chambers and industry associations.
